Dear Colleagues

The first phase of the TAVeM study has been successfully finished and a manuscript has been submitted for publication based on the results of the survey. Every investigator will appear in the manuscript. The second phase started in September and we have 600 patients included being France, Brazil, Spain and Portugal the top enrollers. A total of 66 ICUs from 13 countries are currently recruiting.

We would like to ask for an effort in those ICUs who agreed to participate but have not started the recruitment yet. We also would like to thank all the effort for those ICU who are currently recruiting.

IMPORTANT DECISIONS:

1.- TO MAXIMIZE THE POWER FOR FURTHER ANALYSIS, WE WILL ASK TO THE INVESTIGATORS TO INCLUDE 40 PATIENTS PER CENTRE INSTEAD OF 20.

2.- WE WILL EXPAND THE PERIOD FOR INCLUSION UNTIL 1st^T March 2014.
